EDUCATION

Bachelor of Engineering (B.E.), M.H Saboo Siddik College of Engineering — Expected 2027
Relevant Coursework: Information Technology.

Pre-university courses (PUC), St. Anne's Convent High School and Junior College — 2021 - 2023
Relevant Coursework: Physics, Chemistry, Mathematics, and Computer Science

SKILLS

Programming Language	JavaScript, C++, Python
CSE Fundamentals	Data Structures and Algorithms, OOP, OS, DBMS
Web Technologies	Node.js, React.js, Express.js, JavaScript
Database	Oracle SQL, MongoDB, MySQL
Familiar Technologies & Tools	Git-GitHub, Docker, Postman, Figma

PROJECTS

AMONGUS FOR CODERS Link, *Github* — React.js, Node.js, MongoDB

- Developed a full-stack real-time multiplayer coding game, creating a gamified social-deduction platform for developers to solve problems (DSA) and debug code.
- Engineered a low-latency live-synchronization layer using Socket.io and Monaco Editor to instantly broadcast code updates across clients.
- Applied Sandboxed Execution concepts, utilizing Node's native **vm** module and execution timeouts to securely run and test user submissions.
- Unified passionate programmers on a single competitive platform, leveraging centralized state management to foster peer-to-peer learning and debugging.

MENTAL WELLNESS PLATFORM Link, *Github* — TypeScript, Node.js, ML

- Built Lumina, an AI-powered mental wellness platform with voice AI, mood tracking, and personalized wellness features.
- Developed real-time community chat and anonymous interaction features to enhance user engagement and communication.
- Designed interactive dashboards with mood analytics, streak tracking, and personalized activity recommendations.
- Implemented a modern and responsive user experience with gamified wellness features and scalable application design.

LEADERSHIP

ACM Student Chapter - — 2025-2026

- Designed and managed promotional content for coding events, technical workshops, and hackathons.
- Collaborated with organizing teams to improve event outreach and student engagement within the developer community.

Hackathon Volunteer

- Coordinated student teams and assisted in managing registrations, scheduling, and event operations during college-level hackathons.
- Supported smooth execution of technical events by collaborating with management and organizing teams.

EXTRA-CURRICULAR ACTIVITIES

- **Volunteer (Blood Donation Camp) :** Contributed to a large-scale campus blood donation drive, managing donor registrations, crowd flow, and logistics support to help secure 500+ donations.
- **AI & Open Source Exploration :** Actively exploring AI, machine learning, and scalable intelligent systems through projects, hackathons, open-source learning, and developer communities.

ACHIEVEMENTS

- Shortlisted as finalist in Hacksagon 2026 competing with more than 200+ teams (National Level Hackathon)
- Successfully engineered and delivered 5+ web development projects for clients using modern web technologies.
- Contributed as a Full-Stack Developer Intern at Sarvapriya Foundation, helping build and optimize digital solutions for community initiatives.
